PROFESSIONAL SUMMARY

Undergraduate **Information Technology** student at **North Carolina A&T State University** with applied experience in **cybersecurity**, **applied cryptography**, and **systems programming**. **FOSSI Scholar** and first-place winner of the **Rockwell Automation Innovation Challenge**. Ships tested, documented software and seeks research, internship, and co-op opportunities in **cybersecurity**, **cloud**, and **software engineering**.

EDUCATION

North Carolina Agricultural and Technical State University Greensboro, NC

B.S. Information Technology — Department of Computer Systems Technology

Expected graduation: May 2028 | Cumulative GPA: 3.12

- **Relevant coursework:** Data Structures, Principles of Computer Programming I & II, Introduction to Computer Science, Calculus I

Georgia Military College

Fairburn, GA

Associate of Science

Expected completion: May 2027 | Cumulative GPA: 3.06 | 40 credits transferred

- **Coursework:** Data Structures (A), Introduction to Computer Science (A), Principles of Computer Programming I (A) & II (B), Calculus I, Precalculus, College Algebra, English Composition I

TECHNICAL SKILLS

Programming Languages: Python, TypeScript / JavaScript, SQL, GML, GLSL, C/C++ (foundational), Java (foundational), HTML

Operating Systems: Windows, macOS, Linux

Tools & Frameworks: Git / GitHub, GitHub Actions (CI/CD), Vite, Vitest, Web Crypto API, GameMaker Studio 2, Microsoft 365, SharePoint, Adobe Creative Suite

Security & Systems: Malware analysis and threat intelligence, **Azure AD / Entra ID** and **M365 forensics**, static reverse engineering, AI red-teaming, applied cryptography (**AES-256-GCM**), steganalysis, **SQL database design**, technical documentation

PROJECTS

SteganOS — Steganography & Steganalysis Toolkit

2026

TypeScript, Vite, Vitest, Web Crypto API, GitHub Actions | [Link to repo](#) | [Live demo](#)

- Built a browser-based tool that embeds **AES-256-GCM**-encrypted payloads into PNG images via least-significant-bit encoding and into plain text via zero-width Unicode characters.
- Implemented **chi-square** and **sample-pair** steganalysis to detect the same techniques the tool produces, pairing the offensive and defensive sides of the problem.
- Designed a layered architecture keeping encryption and position-selection logic carrier-agnostic, so a new carrier format requires one module rather than a restructure.
- Wrote **38 tests** covering round-trip integrity, failure modes, and steganographic properties; a **GitHub Actions** pipeline gates deployment on the suite passing.

Stolen Reverie — 2D Action-Platformer

Jan 2026 – Present

GameMaker Studio 2, GML, GLSL, Git / GitHub | Solo developer

- Sole developer of a ~7,100-line codebase spanning **18 gameplay systems**, 33 objects, and a custom **GLSL** shader; managed with **Git / GitHub** on a feature-branch and worktree workflow.
- Refactored a hardcoded attack system into a **data-driven architecture** where new behavior is defined as data rather than new code paths, eliminating duplicate logic and resolving multiple state-machine defects.
- Decoupled collision from animation through a sprite-mask architecture, allowing display art to change without breaking hitbox behavior.
- Diagnosed engine-level build failures (asset stripping from string-only references, project-format version mismatches) and standardized the corrected formats in documentation.

COMPETITIONS & AWARDS

Rockwell Automation Innovation Challenge — 1st Place

- Won first place for overall performance, efficiency, and technical execution in a hands-on simulation of a modern automotive manufacturing assembly line.
- Applied **SQL database design**, real-time production data capture and analysis, and introductory **PLC programming** within an **Industry 4.0** context.

FMA x EMB FinTech Case Competition — 2nd Place

- Placed second for data presentation, market analysis, and business model design in a competition co-sponsored by **JPMorganChase**, **Fidelity**, and **KPMG**.
- Developed an **AI-driven** behavioral solution targeting impulsive spending among young adults using intrusive reminders, spending tracking, and pattern insights.

Cybersecurity Capture the Flag (CTF) Competition

- **Malware analysis and threat intelligence:** identified Babuk-derivative ransomware through **SHA256** hash pivoting and threat-intel correlation; extracted IOCs including mutex strings and behavioral indicators.
- **Cloud identity forensics:** analyzed **Entra ID** logs to reconstruct a cloud attacker kill chain spanning account compromise, role escalation, **OAuth** consent abuse, and persistence via malicious applications and guest accounts.
- **Reverse engineering:** performed static analysis on **Windows PE** samples to identify anti-debugging and file-corruption routines without detonation.
- **AI red-teaming:** crafted adversarial inputs to bypass an **LLM**-based ticket-classification system.

FOSSI Scholar — \$40,000 STEM Scholarship

- Future of STEM Scholars Initiative award supporting STEM study at a Historically Black College or University; sponsored by **Chemours**; provides ongoing industry networking, funding, and mentorship across hundreds of partner companies.

LEADERSHIP & ACTIVITIES

Treasurer — Women in Science and Technology (WiST)

Greensboro, NC

- Manages membership dues collection and maintains accurate financial records for a campus-wide STEM student organization.
- Coordinates with the faculty advisor on financial transparency and compliance, and supports executive-board programming across science and technology disciplines.

PROFESSIONAL EXPERIENCE

Salesperson — Workout Anytime

Tyrone, GA | Sept 2025 – Jan 2026

- Used **DataTrak** software to manage member accounts, agreements, billing issues, and sales records.
- Resolved an average of 15 customer inquiries per day in person and by phone, handling sensitive member information with discretion.
- Sold tiered memberships matched to individual member needs and supported a high club retention rate.

Various Restaurant Positions

Various Cities, GA | Aug 2021 – Sept 2025

Borgo Italia, Five Guys, Panera Bread, Crumbl, Karvela Pizza

- Delivered customer service and front-of-house support in high-volume food service environments.
- Processed 50–100+ orders per hour at peak with high accuracy; trained to manage shift responsibilities and maintain service standards.

CERTIFICATIONS IN PROGRESS

- **AWS Certified Cloud Practitioner (CLF-C02)** — in progress
- **CompTIA Security+** — in progress
- **TryHackMe SOC Level 1** — in progress
